SUBJECT: Investing in the Health of Our Worship Leader

Dear [Add Church Team Staff Name],

I want to share an opportunity that I believe will strengthen both our worship ministry and our church as a whole.

Asaph's Table is a nonprofit ministry that partners with churches to support worship leaders through theological formation, mentorship, and sustainable ministry practices. Their work is designed to come alongside pastors, not replace leadership, and to help worship leaders serve with clarity, longevity, and health.

We are considering enrolling our worship leader in Asaph's Table as a proactive investment in their formation and in the long-term health of our worship culture. I believe this aligns with our values of stewardship, clarity, and care for those who serve our congregation week after week.

I'm happy to share more details and answer any questions.

Grace and peace,
